HILTON YUXI FUXIAN LAKE

关于抚仙湖

About Fuxian Lake

抚仙湖是我国最大蓄水量湖泊、最大高原深水湖、第二深淡水湖泊，属南盘江水系，湖平面呈南北向的葫芦形，流域径流面积1053平方公里（含星云湖378平方公里），湖岸线总长约100.8公里，最大水深约158.9米，平均水深约95.2米，相应湖容约206.2亿立方米，水质为I类。

Fuxian Lake is the lake with the largest water storage, the largest deep-water lake on the plateau, and the second deepest freshwater lake in China. It belongs to the Nanpanjiang river system. The plane of the lake is north-south in the shape of a gourd. The runoff area of the basin is 1,053 square kilometers (including 378 square kilometers of Xingyun Lake). The total length of the lake shoreline is about 100.8 kilometers, the maximum depth of water is around 158.9 meters, and the average depth is around 95.2 meters. The corresponding capacity of the lake is about 20.62 billion cubic meters, and the water quality is Class I.

抚仙湖的名字还与一个神话故事有关，相传玉皇大帝派了天上的肖、石二仙到人间巡查，来到滇中，只见一池碧水、波光粼粼，两仙人被湖光山色所迷，忘了返回，日久天长变为两块并肩搭手的巨石，永远站立湖边。过去湖东南方有两石在湖中并肩搭手倚立，据说就是肖石二仙，风和日丽的好日子，在湖上驾舟遥望，还能若隐若现地看到两仙人在观赏，为留其迹，故名“抚仙湖”

The name of Fuxian Lake is also related to a mythical story. It is said that the Jade Emperor sent two immortals, Xiao and Shi, to inspect the human world. As they came to the central part of Yunnan, they saw a pool of blue water sparkling in the sunlight. The two immortals were fascinated by the natural beauty of the lake and mountains. They forgot to return. Over time, they turned into two huge stones, shoulder to shoulder, standing by the lake forever. In the past, there were two stones standing side by side in the southeast of the lake, which was said to be the two immortals-Xiao and Shi. When it is a good and beautiful day, people who took a boat on the lake could still faintly see these two immortals watching the scenery. In memory of them, the lake was named "Fuxian" (two fairies with their hands on each other's shoulders)
